Lab 4 Assessment

Q1

```
.global _start
.data
    SONGKHA: .word 1,0x13,5,4,0x12,0x17
          array_min: .word 0
          array_sum: .word 0
.text
_start:
      ldr r0, = SONGKHA
            ldr r1, = array_min
            ldr r2, = array_sum
            mov r10,#1   @MAX --> Value 1
            mov r4,#0    @Sum --> value 0
            loop1:
      ldr r3,[r0]
      cmp r10,r3
            bgt update   @Update When r10 lass then r3 , Or Skip this step.
            b adding

            update:
```

```
        mov r10,r3
        str r10,[r1]

        adding:
        add r4,r3,r4
        add r0,r0,#4
        str r4,[r2]

        ldr r6,[r1]
        ldr r7,[r2]

    b loop1
    swi 0
```

Q2

```
.global _start
_start:
        mov r6,#5
        find:
        cmp r6,#0
        bmi negative
        mov r1,#0
        negative:
        mov r1,#1
```

swi 0

Q3

CPU later don’t support function.

.global _start

_start:

mov r1,#3

bl 8_diya_vaag

8_diya_vaag:

lsr r1,r1,#3

```
cmp r1,#0
bgt check
mov r8,#2
swi 0
check:
mov r8,#3
swi 0
```
